

Variable Hour Courses

Students enrolling in a variable credit hour class will need to input the number of hours for the course. Due to the two distinct scrolling zones, students often miss the box where they can input the correct number of hours for a class.

Attached is a screenshot of a variable hour course that offers many sections. For courses that have many sections, there are two main scrolling areas. Students can scroll through the offered section with their cursor anywhere in the red highlighted area (scrolling area 1).

Before clicking Register, students should WAIT and proceed to the next page of instructions.

Scrolling Area 1
 Scroll through the sections offered with your mouse cursor in this area and select the appropriate section for enrollment.
 Do not click Register.

Cancel

Variable Hour Courses

1. With your mouse cursor in either of the two shaded areas, scroll down until you see the **Units** box indicated in the attached screenshot.
2. Input the correct number of hours for the course.
3. Once the section number and the number of units are correct, then proceed with clicking **Register**.

Important Note: If a student is already enrolled in the wrong number of hours, that student will need to drop the class, then re-add it with the correct number of hours. The Swap function cannot be used to change the hours. Prior to dropping the class, students should ensure that they can still add a class to their schedule.

Check for Holds – Any hold labeled “Registration Add” or “Full Registration” will prevent a registration change.

Check the Academic Semester Calendar – If the registration deadline has passed, students will need to submit an [ACOR](#) in order to change the variable hours.

The screenshot shows a web interface for selecting courses. On the left, a vertical orange bar is labeled "Scrolling Area 2". The main area contains a table with 33 items. The table has columns for Select, Section, Eligible, Section Status, Start Date, End Date, Delivery Mode, and Meeting Patterns. The first row is selected with a blue checkmark. Below the table, there is a "Units" input box containing the number "1", which is highlighted with a red box. A red arrow points from a text box to this input box. The text box says "Input the correct number of hours in the box". Below the input box, there is a "Unit Type" dropdown menu set to "Carnegie Units". At the bottom of the interface, there are "Register" and "Cancel" buttons.
